

Dear Mr. Johnson,

I didn't know what to expect coming into this inetrnship. But know I will leave with my expectations reached and surpassed. This internship has taught me many things and made me a better person from it. Being a fourteen year old in a professional business place can be intimidating but you're amazing staff made this an easy transition. I've learned how to work better in a team, with the help of the team projects and working with your staff on their projects. Also from seeing how you're different programs have many aspects and how it takes a team to run a program. I have also learned to be more independent from this internship. I have had to do a lot of task on my own. This has definitely built my character. The professionalism in this facility is also a big part.

I have also experienced many things I wouldn't have experienced anywhere else. For example making an income, not only has this taught me to be more responsible it's taught me to manage money better. Also feeling like I've made a difference in the short time I've been here. Knowing that all the money raised at the NHA Golf Tournament is going to help a family, a child, or adult in some way. Or working with CACU and being able to provide resources to families in need and making sure their child's education is being fulfilled. This job have given me many unbelievable experiences like meeting Chris Tucker and has taught me many things and has shaped me into a better person. So I would just like to say thank for giving me an amazing summer.

Sincerely,
Dayna Carson
CACU Intern
MMHS student
