A price can be fixed, and provided but the actual product may increase the same % up or down based on raw commodities used in fresh milk for class I, II, III commodities. This is provided by the California Milk Board so it is not any proprietary formula, although the bid requires fixed pricing for all products this regulation would need to be addressed, are we able to increase/decrease based on these regulations the exact amount or % the Milk Board regulates? This would be an escalator clause 0 go to www.cdfa.ca.gov/dairy-, Food and Agriculture section 61384 and 61391, Public Agency Prices “sales below cost”, please contact me for further information we can walk through it.

This subdivision applies to finished products, and does not apply to sales of bulk milk between handlers.

(b) For the purposes of this section, the following terms have the following meanings:

(1) "Cost," as applied to manufacturers and distributors, means the total consideration paid or exchanged for raw product, plus the total expense incurred for manufacturing, processing, handling, sale,
and delivery.

(2) "Cost," as applied to wholesale customers, means the invoice price charged to the wholesale customer, or the expense of replacement, whichever is lower, plus the wholesale customer's cost of doing business.

(3) "Cost of doing business," as applied to wholesale customers, means a wholesale customer's total operating expense divided by the customer's total sales income.

(4) (A) Except as provided in subparagraph (B), "total consideration paid or exchanged for raw product," in the case of market milk or market cream used in the manufacture of class 1, 2, and 3 products, means the department's current announced regulated minimum price of the market milk or market cream, payable by handlers to producers, except as provided in Section 62708.5.

(B) Notwithstanding subparagraph (A), in situations involving sales on a bid basis to public agencies or institutions, the definition in subparagraph (A) shall only apply to market milk or market cream that is utilized for class 1 purposes, as those purposes are defined in Chapter 2 (commencing with Section 61801).

(c) Proof of cost, based on audits or surveys conducted in accordance with generally accepted accounting principles as defined by the American Institute of Certified Public Accountants and the Financial Accounting Standards Board, and modified, if necessary, to satisfy the requirements of this section, shall establish a rebuttable presumption of that cost at the time of the transaction of any sale. (1) The meeting, in good faith, of a lawful competitive price or a lawful competitive condition.

(2) A distributor's action in making conditional sales of equipment or other property, extending credit for merchandise purchased, or paying a customer's obligations not otherwise prohibited by this chapter to another distributor in connection with the transfer of the customer's business from the latter to the former.

(1) Any modifications to the generally accepted accounting principles described in subdivision (c) necessary to satisfy the requirements of this section.
